**WE MAKE
YOUR PROJECTS REAL**

HOW WE WORK

Logistics, Distribution and Communication

SOLINTAL designs, incorporating into its products' architecture its **experience in providing functionality and usability**. Our location, at the same distance from both the Atlantic and Mediterranean ports, allows it to offer different shipping alternatives.

The manufacture of **products that meet the most stringent requirements**, involving the establishment of measures, control and monitoring in our manufacturing system in addition to the ongoing training of our professionals, distributors and collaborating workshops for our after-sales service.

They all form part of the highly-specialized technical support offered by **SOLINTAL** to guarantee the repairs, certified rebuilds and other requirements of our CUSTOMERS.

Quality System. Committed to the Environment

Well-known **companies from different fields and sectors** of manufacture of machines and components for mining, earthmoving and dredging **trust in SOLINTAL** for their buckets, dippers, fillers, designs, installations and accessories because they know they can rely on our products, manufactured using laminated steel of only the best brands, reputed cast iron and finishing elements, and welding and mechanized components of the highest quality. All with proven results in the severest working conditions. All this is complemented with the finest manufacturing techniques, the quality of which is **certified to UNE-ENISO9001:2000**.

We tackle new mining, environmental and mechanical concepts from a global viewpoint, always based on the philosophy of **offering the most appropriate solution for each situation**.

OUR PRODUCTS ARE GUARANTEED AND COME WITH A PERSONALIZED SUPPORT SERVICE

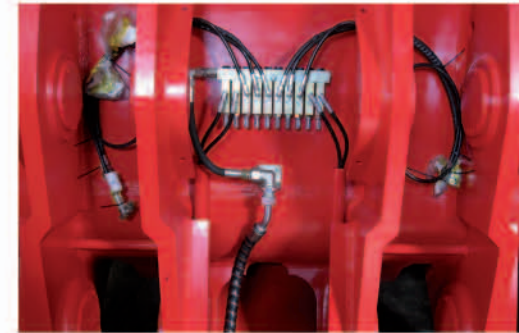

State of the Technique. Our Technological Resources

The optimization of our production is an ongoing challenge, solved with **the most advanced technological resources**, with special attention to service so as to respond to the demands raised by the sector in the shortest time possible.

Based on **the talent and know-how of all our truly professional employees**, who combine in their daily activities the best of tradition with the technological innovation of modern means of production, care and discipline are our watchwords for ensuring **excellence in our products**, in collaboration with our CUSTOMERS.

Our Range of Products and Services

SOLINTAL has an **extensive range of implements** for the complete equipping of excavators, loaders and dumpers plus other products relating to stripping, loading, unloading and processing in mining, public works and other industrial activities. Our characteristics are present in our complete product range, particularly buckets for mining machinery.

Guarantees and References

All our implements, particularly our buckets, shovels and hoppers for the mining industry, **are manufactured from materials defined in the project design**. Basically, our customers' experience provides the inspiration for the workmanship and finest quality which, together, ensure that they are unique accessories thanks to their durability and low maintenance.

SOLINTAL IS AN INDUSTRIAL COMPANY WITH EXTENSIVE EXPERIENCE IN THE MINING SECTOR

CONFIDENTIALITY WITH OUR CLIENTS

OUR TARGET: THE CUSTOMER

SOLINTAL is an industrial company with **many years of experience**.

Our implements are **offered with different finishes**, to adapt them to a wide variety of uses.

Our advanced technology in the field of ergonomic design guarantees ease of use with **more complex models** and details that increase the original designs' possibilities. **The fine technical precision applied to all our designs** ensures that our CUSTOMERS' requirements are met with intelligence and efficiency.
